

# WILSON BOULEVARD EXTENSION AND WHITE LAKE BOULEVARD SAFETY IMPROVEMENTS

Pursuant to the Collier County Growth Management Plan for the future Wilson Boulevard Extension and an agreement between Collier County and Florida Rock, road improvements will be undertaken for the corridors highlighted in the map below. The improvements are planned to be constructed in three phases: White Lake Boulevard safety improvements, and Wilson Boulevard Extension Phase 1 (also known as mining haul road), which in the future will be further improved to serve as the Wilson Boulevard Extension. Typical sections are shown on the back of this sheet. The first two segments will be completed by Florida Rock in order to improve access and safety along the corridor and access to its mining operations. The final phase, Wilson Boulevard Extension, will be undertaken by Collier County at an undetermined time in the future.

More detailed information, as well as project updates, are available at <http://www.barraco.net/floridarock>.

## LEGEND

	White Lake Boulevard Safety Improvements Corridor
	Wilson Boulevard Extension Phase 1 (aka mining haul road 2-lane)
	Wilson Boulevard Extension (future 4-lane)
	Developer Onsite Right of Way
	Developer Onsite Drainage Easement
